Additionally, to boost the establishment of Principal Hubs in Malaysia, the government has proposed for application period for Principal Hub incentive for companies undertaking qualifying services activities be extended for

another two years.

The government also plans to introduce a new tax incentive scheme for global trading centres, with an income tax rate of 10 per cent for a period of five years and renewable for another five years, as a measure to enhance and simplify tax incentive for trading activities previously covered under the Principal Hub incentives.

It will also increase the sales limit for value-added and additional activities carried out in the Free Industrial Zone and licensed manufacturing warehouse from 10 per cent to 40 per cent of the company's annual sales value.

Tengku Zafrul said in addition to the incentive for companies which are relocating their operations to Malaysia, a special income tax rate treatment for non-resident individuals holding key positions in companies investing in new strategic investments will also be introduced.

"This tax incentive is limited to five non-resident individuals employed in each company that has been granted relocation tax incentive under the PENJANA initiative," he said.
